                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             The invention relates to novel broad-spectrum resistance gene Pi2 and the NBS(1-6) genes present in the Pi2 gene cluster region. The rice Pi2-like disease resistance nucleic acid molecules are useful for enhancing disease resistance in plants. The present sequence represents a cDNA encoding a rice NBS4 polypeptide.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           CTGAGCTTGTTGGGTTTTCTGACTCCAAGAAAGGCTGCTTGAAATGATCGATACCAATG 316

Nucleic acids encoding nucleotide binding site (NBS) proteins NBS1, NBS2 and NBS3, useful for producing plants resistant to Magnaporthe grisea
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 The invention comprises the amino acid and coding sequences of nucleotic binding site (NBS) proteins from the Oryza minuta P19 locus (bacterial blight and rice blast resistance genes). The DNA sequences may be used a markers for resistance to infection with Magnaporthe grisea in plant breeding programs. The present DNA sequence represents an NBS gene from the Oryza minuta P19 locus.

                                                   The invention comprises the amino acid and coding sequences of nucleotide binding site (NBS) proteins from the Oryza minuta Pi9 locus (bacterial blight and rice blast resistance genes). The DNA sequences may be used as markers for resistance to infection with Magnaporthe grises in plant breeding programs. The present DNA sequence represents an NBS gene from
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               684
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      606

                                                                                    The invention relates to novel broad-spectrum resistance gene Pi2 and the NBS(1-6) genes present in the Pi2 gene cluster region. The rice Pi2-like disease resistance nucleic acid molecules are useful for enhancing disease resistance in plants: The present sequence represents a cDNA encoding a rice NBS1 polypeptide.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         CTACTAGCAAAGACAAACATAAGACTTGAAGACATGGAAAATGATGAGGACTTGGGCAGC 1092

The DNA sequences may be used as markers for resistance to infection with Magnaporthe grisea in plant breeding programs. The present DNA sequence represents an NBS gene from the Oryza minuta Pi9 locus.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              904
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   964
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  784
                                                                                                                                                                                                       The invention relates to novel broad-spectrum resistance gene Pi2 and the NBS(1-6) genes present in the Pi2 gene cluster region. The rice Pi2-like disease resistance nucleic acid molecules are useful for enhancing disease resistance in plants. The present sequence represents a cDNA encoding a rice NBS3 polypeptide.
                                                                                                                       New rice Pi2-like disease resistance nucleic acid molecule that confere disease resistance in plants, useful for creating or enhancing disease resistance in plants.
                                                                                                                                                                                                                                                                                                                                                                        TIGGGTTTTCTGACTCCCAAGAAAAGGCTGCTTGAAATGATGGTACCAATGCTAATGATG

```
The invention comprises the amino acid and coding sequences of nucleotide binding site (NBS) proteins from the Oryza minuta Pi9 locus (bacterial blight and rice blast resistance genes). The DNA sequences may be used as markers for resistance to infection with Magnaporthe grisea in plant breeding programs. The present Oryza minuta DNA sequence was used in the exemplification of the invention.

                                                                                                                                                                                                                                                                                                                                                                                                                                             The invention comprises the amino acid and coding sequences of nucleotide binding site (NBS) proteins from the Oryza minuta P19 locus (bacterial blight and rice blast resistance genes). The DNA sequences may be used as markers for resistance to infection with Magnaporthe grisea in plant breeding programs. The present Oryza minuta DNA sequence was used in the exemplification of the invention.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     151 GGTACCCAAAGGAATAGGTAAGTTGCGAGACTTGCAGGTTCTAGAGTATGTAGATATCAG 210

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                         1 atggcggagacggtgctgag......tgctactggttccagcatga 2997
